

PYTHON PROGRAMMING

ABOUT US

CODSOFT is a vibrant and diverse community that brings together individuals with similar objectives and ultimate goals. Our main focus is on creating opportunities that span various areas, including leadership development, learning, student engagement, and fostering shared interests.

We believe in the power of leadership and its ability to drive positive change. That's why we provide platforms and resources for our community members to develop their leadership skills. Through mentorship programs, workshops, and collaborative projects, we empower individuals to take on leadership roles and make a difference in their respective fields.

INSTRUCTIONS

Update your LinkedIn profiles

For the Python Programming internship, you will need to complete **at least 3 tasks** for successful completion of the internship.

Maintain a separate GitHub repository(name as **CODSOFTJUNE** for all the tasks and share the link of the GitHub repo in the task submission form(it will be given later through email).

You can refer to online resources such as Google Search and read tutorials. Watch videos(For Help).

SUBMISSION

A **TASK SUBMISSION FORM** will be shared later through email (Before **15 July 2023**). Till then please continue your task.

A video need to be created to showcase your work, a demo of your effort.

For the Python Programming internship, you will need to complete **at least 3 tasks** for successful completion of the internship.

The video can be hosted on LinkedIn for proof of your work and to build credibility among your peers.
You can tag **@CODSOFT** in such posts.

Please add **#codsoft** in each of your task video postings on LinkedIn, Additionally, you can also add hashtags such as #internship #webdevelopment. for more reach and visibility

PYTHON PROGRAMMING

**For the Python programming internship, you will
need to complete at least 3 tasks for successful
completion of the internship.**

WWW.CODSOFT.in

TASK 1

TO-DO LIST

A **To-Do List application** is a useful project that helps users manage and organize their tasks efficiently. This project aims to create a command-line or GUI-based application using Python, allowing users to create, update, and track their to-do lists

TASK 2

CALCULATOR

Design a simple calculator with basic arithmetic operations.
Prompt the user to input two numbers and an operation choice.
Perform the calculation and display the result.

TASK 3

PASSWORD GENERATOR

A **password generator** is a useful tool that generates strong and random passwords for users. This project aims to create a password generator application using Python, allowing users to specify the length and complexity of the password.

User Input: Prompt the user to specify the desired length of the password.

Generate Password: Use a combination of random characters to generate a password of the specified length.

Display the Password: Print the generated password on the screen.

TASK 4

Rock-Paper-Scissors Game

User Input: Prompt the user to choose rock, paper, or scissors.

Computer Selection: Generate a random choice (rock, paper, or scissors) for the computer.

Game Logic: Determine the winner based on the user's choice and the computer's choice.

Rock beats scissors, scissors beat paper, and paper beats rock.

Display Result: Show the user's choice and the computer's choice.

Display the result, whether the user wins, loses, or it's a tie.

Score Tracking (Optional): Keep track of the user's and computer's scores for multiple rounds.

Play Again: Ask the user if they want to play another round.

User Interface: Design a user-friendly interface with clear instructions and feedback.

TASK 5

QUIZ GAME

Develop a quiz game that asks users multiple-choice or fill-in-the-blank questions on a specific topic. The game should keep track of scores, provide feedback on correct/incorrect answers, and offer a variety of questions to make it challenging and engaging.

Load Quiz Questions.

Display Welcome Message and Rules.

Present Quiz Questions:

Display each question and answer choice.

Prompt the user to select an answer.

Evaluate the User's Answer:

Compare the user's answer with the correct answer.

Keep track of the user's score.

Provide Feedback:

Display if the answer was correct or incorrect.

Show the correct answer for incorrect responses.

Calculate the Final Score.

Display Final Results:

Print the user's score and performance message.

ASK US FOR HELP!

THE PURPOSE OF THIS INTERNSHIP IS TO LEARN AND GROW.

We have no desire to dictate to you. It is entirely up to you whether you seek guidance or not.

The given tasks may seem very easy or very difficult. We expect you to approach the tasks with professional diligence and give them the attention they deserve."
